17. FEDERAL INVESTMENT

Federal investment is the portion of Federal spending of taxpayer money intended to yield long-term benefits for the economy and the Nation. This spending promises greater benefits than if that money had been allocated in the private sector. It promotes improved efficiency within Federal agencies, as well as growth in the national economy by increasing the overall stock of capital. Investment spending can take the form of direct Federal spending or grants to State, local, tribal and territorial governments. It can be designated for physical capital—a tangible asset or the improvement of that asset—that increases production over a period of years or increases value to the Government. It can also be for research and development, education, or training, all of which are intangible, but can

still increase income in the future or provide other longterm benefits.

Most presentations in the *Analytical Perspectives* volume combine investment spending with spending intended for current use. In contrast, this chapter focuses solely on Federal and federally financed investment, providing a comprehensive picture of Federal spending for physical capital, research and development, and education and training. Because the analysis in this chapter excludes spending for non-investment activities, it gives only a partial picture of Federal support for specific national needs, such as defense.

Total Federal investment spending was \$792 billion in 2021. It is expected to increase by 1.7 percent in 2022 to \$806 billion. The Budget proposes a 1.0 percent increase from 2022 for a total of \$814 billion in 2023.

DESCRIPTION OF FEDERAL INVESTMENT

The Budget uses a relatively broad definition of investment. It defines Federal investment as encompassing spending for research, development, education, and training as well as physical assets such as land, structures, infrastructure, and major equipment. It also includes spending regardless of the ultimate ownership of the resulting asset, or the purpose it serves. For the purposes of this definition, however, Federal investment does not include "social investment" items like healthcare or social services where it is difficult to separate out the degree to which the spending provides current versus future benefits. The distinction between investment spending and current outlays is a matter of judgment, but the definition used for the purposes of this analysis has remained consistent over time and is useful for historical comparisons.²

Investment in physical assets can be for the construction or improvement of buildings, structures, and infrastructure or for the development or acquisition of major equipment. The broader research and development category includes spending on the facilities in which these activities occur and major equipment for the conduct of research and development, as well as spending for basic and applied research, and experimental development.³ Investment in education and training includes vocational rehabilitation, programs for veterans, funding for school systems and higher education, and agricultural extension services. This category excludes training for military personnel or other individuals in Government service.

The Budget further classifies investments as either grants to State, local, tribal and territorial governments (e.g., for highways or education), or "direct Federal programs." The "direct Federal" category consists primarily of spending for assets owned by the Federal Government, such as weapons systems and buildings, but also includes grants to private organizations and individuals for investment, such as capital grants to Amtrak, Pell Grants, and higher education loans to individuals. For grants made to State and local governments, it is the recipient jurisdiction, not the Federal Government, that ultimately determines whether the money is used to finance investment or for current use. This analysis classifies outlays based on the category in which the recipient jurisdiction is expected to spend a majority of the money. General purpose fiscal assistance is classified as current spending, although in practice, some may be spent by recipient jurisdictions on investment.

Additionally, in this analysis, Federal investment includes credit programs that are for investment purposes. When direct loans and loan guarantees are used to fund investment, the subsidy value is included as investment. The subsidies are classified according to their program purpose, such as construction, or education and training.

This discussion presents spending for gross investment, without adjusting for depreciation.

Composition of Federal Investment Outlays

Major Federal Investment

The composition of major Federal investment outlays is summarized in Table 17–1. The categories include major

¹ For more information on Federal grants to State and local governments see Chapter 14, "Aid to State and Local Governments," in this volume.

² Historical figures on investment outlays beginning in 1940 may be found in the Budget's *Historical Tables*. The *Historical Tables* are available at https://www.whitehouse.gov/omb/historical-tables/.

³ A more thorough discussion of research and development funding may be found in Chapter 18, "Research and Development," in this volume

230 ANALYTICAL PERSPECTIVES

public physical investment, the conduct of research and development, and the conduct of education and training. Total major Federal investment outlays were \$791 billion in 2021. They are estimated to increase 1.6 percent to \$803 billion in 2022, and increase by 0.8 percent to \$810 billion in 2023. For 2021 through 2023, defense investment outlays comprise about one-third of total major Federal investment while non-defense investment comprises around two-thirds. In 2022, defense investment outlays are expected to decrease by \$0.2 billion, 0.1 percent, while non-defense investment outlays are expected to increase by \$13 billion, 2.4 percent. In 2023, the Budget projects a defense investment increase of \$20 billion, or 7.7 percent, over 2022 and a decrease in non-defense investment of \$13.6 billion, or 2.5 percent.

Physical investment:

Outlays for major public physical capital (hereafter referred to as "physical investment outlays") were \$339 billion in 2021 and are estimated to increase by 10 percent to \$375 billion in 2022. In 2023, outlays for physical investment are estimated to increase by 6.4 percent to \$398 billion. Physical investment outlays are for construction and renovation, the development or purchase of major equipment, and the purchase or sale of land and structures. Around 64 percent of these outlays are for direct physical investment by the Federal Government, with the remainder being grants to State and local governments for physical investment.

Direct physical investment outlays by the Federal Government are primarily for defense. Defense outlays for physical investment are estimated to be \$193 billion in 2023, \$5.6 billion higher than in 2022. Outlays for direct physical investment for nondefense purposes are estimated to be \$60 billion in 2023, an increase of 4.3 percent from 2022. Among the sources of this increase are an estimated increase of roughly \$1.4 billion in spending on medical facilities within the Department of Veterans Affairs.

Outlays for grants to State and local governments for physical investment are estimated to be \$145 billion in 2023, a 12 percent increase over the 2022 estimate of \$129 billion. Grants for physical investment fund transportation programs, sewage treatment plants, community and regional development, public housing, and other State and tribal assistance.⁴ The increase in 2023 is mostly accounted for by a roughly \$6 billion increase in Federal-aid highways grants and a roughly \$3 billion increase in grants for highway infastructure programs. Much of this investment originates from funding included in the Infastructure Investment and Jobs Act (Public Law 117-58, "IIJA"), which was signed into law on November 15, 2021. The IIJA makes an array of transformational investments in our country's infrastructure.

Conduct of research and development:

Outlays for the conduct of research and development were \$147 billion in 2021. Outlays are estimated to increase by 4.7 percent to \$154 billion in 2022, and increase by 14 percent in 2023 to \$175 billion. Roughly half of research and development outlays are for defense, a trend which has remained consistent over the past decade. Physical investment for research and development facilities and equipment is included in the physical investment category.

Non-defense outlays for the conduct of research and development are estimated to be \$86 billion in 2023, 7.9 percent higher than 2022. Among the sources of this increase are a roughly \$1.2 billion increase in investment in energy efficiency and renewable energy (funded partially through money from the IIJA) and a roughly \$1.6 billion increase in investment within the National Institutes of Health.

A discussion of research and development funding can be found in Chapter 18, "Research and Development," in this volume.

Conduct of education and training:

Outlays for the conduct of education and training were \$305 billion in 2021. Outlays are estimated to decrease by 9.7 percent to \$275 billion in 2022, and decrease by 14 percent in 2023 to \$237 billion.

Grants to State and local governments for this category were \$86 billion in 2021. They are estimated to increase by 31 percent to \$113 billion in 2022, and decrease by 29 percent to \$80 billion in 2023. In 2023, grants are estimated to be one-third of total investment in education and training. This pattern of spending on grants to State and local governments for education and training is largely explained by changes in spending levels in response to the health and economic crises caused by the COVID-19 pandemic. For example through the Education Stablization Fund, which received roughly \$166 billion in funding from the American Rescue Plan Act of 2021 (Public Law 117-2), the Department of Education outlayed roughly \$25 billion in grants for education and training in 2021. Grants for education and training from this fund are estimated to increase to roughly \$34 billion in 2022 and decrease to roughly \$11 billion in 2023.

Direct Federal education and training outlays in 2021 were \$219 billion. They are estimated to decrease by 26 percent to be \$162 billion in 2022, and decrease by a further 3.6 percent to \$156 billion in 2023. These decreases are largely explained by changes in accounting for the Federal Direct Student Loan Program. In 2021, outlays in this account totaled \$130 billion, mainly due to \$71 billion in upwards modifications and \$54 billion in upward reestimates and interest on the reestimates. There were much smaller upward modifications and reestimates in 2022: \$12 billion and \$27 billion, respectively, yielding total estimated outlays for 2022 of roughly \$48 billion. In 2023, outlays are estimated to be just \$14 billion and are only associated with loan subsidies for the 2023 cohort; no modifications or reestimates for 2023 have been made.

Programs in this category primarily consist of aid for higher education through student financial assistance, loan subsidies, and veterans' education, training, and rehabilitation. This category does not include outlays for

 $^{^4}$ In the 2023 Budget, Transit Infrastructure Grant amounts are shown as grants to State and local governments (as compared with the 2022 Budget, when they were categorized as direct Federal physical investment) based on further review of program operations.

education and training of Federal civilian and military employees. Outlays for education and training that are for physical investment and for research and development are in the categories for physical investment and the conduct of research and development.

Major Federal investment outlays will comprise an estimated 14.0 percent of total Federal outlays in 2023 and 3.2 percent of the Nation's gross domestic product. Budget authority and outlays for major Federal investment by subcategory may be found in Table 17–2 at the end of this chapter.

Miscellaneous Physical Investment

In addition to the categories of major Federal investment, several miscellaneous categories of investment outlays are shown at the bottom of Table 17–1.

Outlays for commodity inventories are for the purchase or sale of agricultural products pursuant to farm price support programs and other commodities. Sales are estimated to exceed purchases by \$2.0 billion in 2023. Outlays for other miscellaneous physical investment are estimated to be \$5.9 billion in 2023.

Detailed Table on Investment Spending

Table 17-2 provides data on budget authority as well as outlays for major Federal investment, divided according to grants to State and local governments and direct Federal spending. Miscellaneous investment is not included in this table.
